

15. EMS BREED CODING SYSTEM

The FIFe's Easy Mind System (EMS) simplifies and replaces the combination of letters and numbers used to identify cats. Below is the coding as it applies to ACF recognised Breeds/Colours/Patterns.

15.1. RECOGNISED BREEDS:

The first part of the EMS code, written in uppercase letters, denotes the breed. # subject to change pending FIFe approval

15.2. RECOGNISED COLOURS:

The second part of the EMS code, which identifies a cat's colour, is always written in lower case letters.

a = blue
b = chocolate
c = lilac
d = red
e = cream
f = black tortie **subject to CFA coding for tri- colour [mike JBT].**
g = blue tortie
h = chocolate tortie j = lilac tortie
m = dilute modifier colour (Dm) am = caramel (blue based) cm = caramel (lilac based) pm = caramel (fawn based) **gm = caramel tortie (blue based) jm = caramel tortie (lilac based) rm = caramel tortie (fawn based)** em = apricot (based on cream) ea *m = apricot (blue based*) ec *m = apricot (lilac based) ep *m = apricot (fawn based)
n = black
o = cinnamon
p = fawn
q = cinnamon tortoiseshell
r = fawn tortoiseshell
s = silver
w = white
x = any unrecognised colour
y = golden
nt = amber (only NFO)²⁴⁴
at = light amber (only NFO)
ft = amber tortie (only NFO)
gt = light amber tortie (only NFO)

'n' comes from the French noir, meaning black. Includes full expression Burmilla; seal (in Himalayan patterned cats), brown (in Bengal, Burmese, some Burmilla [n 31] and Tonkinese [n 32]) tawny (in Abyssinian, Somali and Ocicat).

15.3. RECOGNISED PATTERNS

The third part of the EMS code, which identifies a cat's pattern, is also written in lower case letters.

01 = van
02 = harlequin (not an ACF pattern) 03 = bi-colour
04 = mitted (only applicable to Ragdoll **and Snowshoe###**)
05 = snowshoe (only applicable to Snowshoe)
09 = unspecified amount of white (eg: locket)
11 = shaded
12 = tipped (shell)
14 = charcoal
21 = unspecified tabby pattern
22 = classic (blotched) tabby
23 = mackerel tabby
24 = spotted tabby
25 = ticked tabby
28 = Karpati
31 = Burmese pattern (cbcb)
32 = Mink (FIFe 'Tonkinese') pattern (cbcs)
33 = Himalayan (pointed) pattern
34 = Roan (amelanistic hair) only applicable to Lykoi

Note: 32 Tonkinese: In ACF, we recognise Tonkinese the breed, whereas FIFe does not and uses the breed's name to indicate the mink pattern in the breeds in which it occurs.

²⁴⁴ FIFe recognise Amber under "t" but do not distinguish the colours

15.4. RECOGNISED EYE COLOURS

The next element of the EMS code is a numerical designation for eye colour, which must be used with breeds that are judged in separate classes according to eye colour.

61 = blue eyed

62 = orange eyed

63 = odd eyed

64 = green

65 = Burmese eye colour

66 = Mink (Tonkinese cbc) eye colour

67 = Siamese eye colour

15.5. BREED SPECIFIC CODES

These codes have been developed for breeds that have particular characteristics:

Tail Codes

Codes that apply to only the Manx and its longhaired counterpart, the Cymric to indicate the amount of tail.

51 = rumpy (no tail)

52 = rumpy riser (*a tiny rise in the bone at the end of the spine*)

53 = stumpy (*a rudimentary tail not longer than 3-4 cm [1.2 to 1.6 inches]*)

54 = longie (*a regular or near regular tail these cats are used for breeding but may not be shown*)

Ear Codes:

Codes that designate the ear type

The American Curl in both short and longhaired versions which although having a “curled ear” may produce straight eared offspring.

71 = straight ears

72 = curled ears

NOTE: The ear code is not applied to the Scottish Fold in both short and long-haired versions which may also produce straight eared offspring although it has a folded ear itself as ACF recognises the straight eared variety as a separate breed Scottish Shorthair/Longhair.

Coat Codes:

81 = LH (only applicable to PEB, *BML ##*)

82 = SH (only applicable to PEB)

83 = Brush (only applicable to PEB)

84 = Straight (only applicable to LPS/LPL & *SRS/SRL##*)

Toe code:

91 = Polydactyl (Pixiebob only) ##

subject to change, pending FIFe approval

16. EMS USER GUIDE

As applicable to ACF recognised Breeds colours patterns. A grey background in the text is used to highlight examples.

General principles and restrictions Please note the following general principles and restrictions:

- An asterisk [*] stands for any information according to the EMS System.
- Individual EMS codes will always be separated from each other by a space unless indicated otherwise.
- Individual EMS codes are always shown in ascending order.
- If a breed is limited to only one specific occurrence of a trait, the code for this trait is never used in that full EMS code.

Breeds

The names of the breeds are always indicated in three capital letters.

PER

BSH

Non-recognised breeds (non)

If the cat belongs to a non-recognised breed, always put 'non' after the breed code.

AMW non (eg American Wirehair)

Non-recognised varieties (x)

If the cat belongs to a non-recognised variety, write an 'x' before the colour code.

MCO x am

Colours (a, b, c, etc.)

The colour codes are always indicated in lower case letters BSH a

NFO nt

Note: the codes for amber (*t) are only applicable to NFO. If the cat's breed is limited to only one colour and the cat doesn't show any pattern, don't use any colour code. BOM (and not BOM n)

Silver (s) / golden (y)

If the cat shows silver or golden, it will always have a lower case 's' or 'y', which is, [except in the case of amber (*t)], not separated by a space from its main colour code.

PER *s

BSH *y

The code for silver or for golden may not be used for hairless breeds (SPH & PEB), regardless of the cat's genotype.

The code for dilute modifier is not separated by a space from its main colour code.
